We love our planet, all 280 million billion tons of it. It's the only home we have, so we want to do our part in keeping it healthy. We don't want pesticide runoff in our streams and rivers, and we do not want pesticides on our fruit! That's why we follow the Washington State Department of Agriculture guidelines for organically grown fruit. No toxic chemicals, pesticides or synthetic fertilizers come near our fruit - we simply don't need them. Come join us in taking care of our planet and ourselves.

Good for the Planet and Good for You.
